

GPCB Mosfet Boost

A classic circuit based on the AMZ Mosfet Booster that will fit into a 1590A if you wish and also features the ability to use a right angle potentiometer directly soldered to the board or you may wire it as normal if you like. Enjoy your FREE board.

Resistors		Capacitors	
R1	10M	C1	1n
R2	2k7	C2	47pF
R3	2k7	C3	100uF
R4	62k	C4	100n
R5	100k	C5	47uF
Transistors		C6	10uF
Q1	BS170	Diodes	
Pots		D1	9.1V Zener
Level	5KC	D2	1N4001

This board is only made available for FREE from GuitarPCB and not individually for sale. There is plenty of info on the WEB if you need a schematic or any other information. This is not only a great boost circuit but also makes a great practice board for you at little cost. If you are receiving this build document it is because you received a FREE board.
